Terry Lee Joins AAM as Senior IT Professional

TEMPE, Ariz. (Oct. 21, 2011) – AAM LLC, a community management company that operates in Arizona and New Mexico, has hired Terry Lee as a senior system administrator in its information technology department.

Lee, an IT-industry veteran with more than 20 years experience, will execute initiatives intended to support AAM's internal and external virtual environments, and help the company in its ongoing mission to develop technology infrastructure that will meet its current and future needs.

She joins AAM from OneNeck IT Services in Scottsdale, where she served customers using the Windows platform. Her career background also includes serving as an information technology manager for a transportation company in Hampton, Va.

Lee, a Gilbert resident, holds a bachelors degree in computer science from Hampton University in Hampton, Va., and has earned the following computer-industry certifications: Microsoft Certified Systems Engineer MCSE, MCSA, MCP 2002.

About AAM

AAM's system of community support has provided more personal attention and expert care per customer dollar than any other homeowners' association management team for over 20 years. Better workload ratios and the longevity of AAM managers ensure each community will be managed by an industry leader who will treat it as their own. Homeowners can expect all AAM professionals to be able to answer the same 193 community management-related questions and to attend HOA meetings in person. A 24/7 emergency pager is just one example of AAM's daily dedication to developing lasting client relationships and delivering peace of mind. For more information, visit <http://www.AAMNM.com/> or <http://www.AAMAZ.com/>.
